The Script

These videos have shown you powerful ways to transform your presentations and leave audiences clamoring to buy.

We discussed how many presenters blow deals with lousy, unfocused, forgettable presentations. Presentations where audiences miss up to 92% of the information presented. Presentations that, instead of making successful sales, leave opportunities on the table, or in the trash can.

At this point, you know your presentation needs a crystal clear message framed within a narrative structure, delivered via tightly integrated script and visuals.

The question is, how do you do that?

The answer is consistent application of the right knowledge with the right tools. And the Power Presentation Pack is designed from the ground up to give you both.

You'll start with the course: Designing Presentations that Sell.

In it, you'll pick up right where we left off with this video series. We'll teach you practical, actionable ways to use Microsoft PowerPoint to build dynamic, visually powerful imagery that supports your message. You'll learn to use animations and transitions to present compelling data in an appealing, easily understood graphical form.

As you learn, you'll take advantage of the second part of the Power Presentation Pack: the Slide2Script tool, a powerful PowerPoint add-in that helps you write excellent scripts that integrate your story with your compelling visuals to make powerful presentations.

Along with these videos you also received the Slide2Script add-in. If you've already used it, you know how it does all the work of compiling a usable script template from your PowerPoint file, with the push of a button, letting you focus on making the most powerful presentation you can.

Act now and we'll add in a third bonus – a copy of the award winning book, "Successful Speaking Secrets: Quick Reference." It's a vital resource for any presenter who wants to master the art of persuasive speaking – and it's yours free with this offer while supplies last.

You've followed the course this far. You know how valuable it is. Take the next logical step and invest in the Power Presentation Pack. You'll get your money back from the sales you make with your very next presentation. You can't find better value than that.

And you won't be alone.

The materials you'll find from the Presentation Power Pack have been used by some of the most successful companies in their industries. Companies like Mercer, Rockwell Collins, and Bibby Financial Services.

Just listen to these excited testimonials from satisfied customers who have used the principles you'll learn in the Presentation Power Pack.

Rick Holinshead, a Senior Partner at Mercer, said "Your program is a religion in this company."

Mark Taylor, Director of Business Development at Rockwell Collins, said "We saw an immediate improvement in audience engagement. Simply put, we make better presentations."

And dozens more satisfied customers have expressed their pleasure with the skills they've learned, calling our lessons "practical," "full of useful tips" and "thought provoking." As a result, they've said their presentations have "boosted sales," "been more effective," and "contributed to us winning business."

And you have nothing to lose. We'll back your investment up with a money back guarantee, in the unlikely event that you're not satisfied. You can keep everything you ordered, too. There's literally no risk.

Sold separately the book, online course and PowerPoint add-in retail for $179.00. But until the timer runs out, you can get all three as the Power Presentation Pack for the phenomenal price of just $97.00. Just $97.00 for a program built from years of experience making presentations, distilled by many man-months of effort into a pointed, powerful package. All the material has been designed by Chris Davidson, a Founding Patron of EVCOM and Fellow of the Professional Speaking Association, responsible for educating thousands of successful presenters on the science and psychology of making sales presentations.

But you only have until the timer runs out! The time to decide is now. If you don't act right now, you'll miss the opportunity to enroll in the practical, pointed Designing Presentations that Sell course. You won't get expert guidance on making stunning visuals a part of every presentation you make; you'll lose Slide2Script, a workhorse tool for tightly integrating those visuals into your script; and you'll miss out on "Successful Speaking Secrets: Quick Reference," an invaluable guide to speaking persuasively.

The clock is ticking down. When it runs out, this valuable combination pack offer runs out with it. Invest now to avoid losing this rapidly closing window of opportunity to turn your future presentations into powerful, persuasive pieces that convert prospects into paying customers.

Act now, before the clock runs out, or miss out!

Start designing presentations that sell today!
