The Script

Meet Bob.

Bob is a small business owner with a big IT problem.

He used the wrong IT company, and now Bob's employees can't get emails, access essential files, or manage their sales calls.

That makes Bob frustrated. He has tried many IT companies, and they've always moved too slow, cost too much, or never understood Bob's problems.

Bob is not buying promises anymore; he wants to try the service first then continue using it as long as he is fully satisfied.

Then Bob found Ai Technology online and signed up for a free network assessment. What he learned surprised him. Ai Technology's assessment was easy to understand and achievable. It gave Bob a road map for solving his IT problems.

And because Bob's small business qualified, Ai Technology offered him a free month, no commitment trial of managed IT services.

With no risk, Bob signed up for a free month trial. Right away, emails worked, documents were accessible, and sales calls went as smooth as silk.

And even though Bob could have canceled anytime, he saw the value in Ai Technology's no long term contract, month to month managed IT services.

Finally, Bob had an IT partner who understood him.

You can too.

Click the link for your own free network assessment, and learn whether your company qualifies for a free trial of managed IT services; services you'll be happy with.

Just like Bob.
