

The Path from WWII to Climategate

This will document that an exceedingly selfish, intelligent mind - perhaps the one that controlled central Eurasia and ruled the USSR during World War II (*The exact identity is unimportant*):

1. Knew of Aston's **12 Dec 1922** promise and warning about nuclear energy [1]
2. Captured Japan's atomic bomb plant at Konan, Korea after Japan's first atomic bomb test on **12 Aug 1945** [1]
3. Downed an American B-29 and held the crew for negotiations in **Aug-Sept 1945** [1]
4. Totally blocked all western news coverage of the above events #2 and #3 during negotiations to form the United Nations on **24 Oct 1945** [1]
5. Arranged for the official newspaper of the USSR – *Izvestia* – to publish a personal attract on David Snell on **13 Oct 1946**, exactly ten days after David Snell reported news of the above items #3 and #4 in the *Atlanta Constitution* on **3 Oct 1946** [2].
6. Started changing scientific textbooks of nuclear and solar physics in **1946** to obscure the energy that makes heavy atoms, atomic bombs and ordinary stars explode and/or release neutrons that decay to hydrogen atoms – **NEUTRON REPULSION** [3,4] – by replacing
 - Aston's valid concept of "***nuclear packing fraction***" with the flawed concept of "***nuclear binding energy***" by Carl von Weizsacker, a theoretical nuclear physicist that advised Hitler's unsuccessful effort to build at atomic bomb during WWII.
 - Valid mainstream opinions of ***the Sun's iron-rich interior*** in **1945** with the post-WWII dogma of hydrogen-filled stars (***The Standard Solar Model***) in **1946** [4].
 - ***Rational utilization of nuclear energy during WWII*** - knowing that skin rash or sunburn is an early indication of radiation damage - with ***irrational fears of nuclear energy and exaggerated dangers of nuclear radiation after WWII*** [5].

The selfish, intelligent mind of 1945 was thus blinded to the **ONE FATAL FLAW** in plans to:

- Forbid public knowledge of the energy source in atomic bombs and nuclear reactors
- Rule the world with a post-WWII network of National Academies of Pseudo-Science

The human mind cannot compete with the mind of the Creator: *Divine simplicity and elegant beauty of the cosmos [6,7] cannot be explained nor duplicated by the most clever deceit the selfish human mind can design, even with unlimited public funds for scientists to fabricate data.*

The universe consists of two forms of one fundamental particle - the neutron and its expanded form, the hydrogen atom [3,4]; The energy in atomic bombs is the SOURCE OF ENERGY that powers the cosmos and sustains life as neutrons are released from cores of heavy atoms, planets, stars and galaxies to become interstellar hydrogen atoms in an expanding universe [6,7].

I.e., as compact neutrons are transformed into hydrogen atoms, the universe and the local solar system both expand, entropy increases and the laws of cosmology, thermodynamics, and nuclear physics merge into a system of physical sciences that complement spiritual knowledge.

Later as the supply of neutrons disappears, neutron repulsion will be replaced as the dominant force in the universe by the gravitational attractive force between interstellar hydrogen atoms. The cyclic process driving the infinite universe will reverse spontaneously. The universe will contract, hydrogen atoms collapse into neutrons and the entropy of the universe will decrease. This process occurs spontaneously, without black magic injections of a *Primordial Big Bang, Dark Energy, Oscillating Solar Neutrinos, Quarks, Gluons, God Particles, Black Holes, etc.*
