

The Great Social Experiment

Oliver K. Manuel

Climate and Solar Science Institute and Former NASA PI for Apollo at Univ. Missouri
833 Broadway, Cape Girardeau, MO 73701 USA, Email: omatumr2@gmail.com

Abstract: The Great Social Experiment of **1945-2015** [1] has ended, despite almost seventy years of social benefits. The experiment was initiated by Einstein's **1905** discovery [2] that $E = mc^2$, mass (**m**) is stored energy (**E**); Aston's promise and warning in **1922** [3] that mankind will find "*powers beyond the dreams of scientific fiction*" in cores of atoms; Misuse of that energy to destroy Hiroshima on **6 AUG 1945**; Unreported CHAOS and FEAR of nuclear annihilation [4] in **AUG-SEPT 1945**; and then Formation of the United Nations on **24 OCT 1945**. The Great Social Experiment expired this month when the United Nations, leaders of nations, and armies of government-funded consensus scientists were unable or unwilling to reply to nine pages of precise experimental data [5] that **FALSIFY** the UN's agenda-driven **Standard Solar Model, Standard Nuclear Model, Big Bang Cosmology** and **Standard Climate Models**. The data [5] confirm many ancient spiritual truths but regrettably the experiment continued until world-wide violations of the scientific method to fit UN's Agenda 21 [1] were exposed [5].
