

Homemade Baby Wipes

Ingredients

Paper Towel Roll
Ice Cream Bucket or Reusable Plastic Tub
2 Cups Warm Water
1 Tbsp Rubbing Alcohol
2 Tbsp Baby Oil
2 Squirts Liquid Baby Soap
Electric Knife or Sharp Kitchen Knife, and Utility Knife/Stanley Knife

Directions

Take ice cream bucket lid or reusable plastic tub lid and cut a large "X" in it. Cut paper towel roll in half using sharp knife or electric knife. Place paper towel roll in tub.

Measure warm water into a measuring jug. Add the alcohol, baby oil and baby soap and gently mix together.

Pour liquid over the paper towel and let soak. After the liquid is absorbed into the paper towel remove the cardboard middle and pull the towel through the "X" slit, and secure the lid.

Notes

- The paper towels need to be a high quality, such as Bounty or Viva so the wipes will not break apart easily when being used.
- Placing Duct Tape on both sides of the lid before cutting the "X" will help stop it cracking or splintering.
