200 Series

In the hospital and healthcare environment, surgical instruments and devices require high level cleaning prior to sterilization and re-use. The use of ultrasonic cleaners for this critical step has been at the forefront of this application for over forty years.

Standard Features:

- Stainless Steel Console
- Safety Interlocked Cabinet Door
- PLC Controlled
- Rear Control Panel with Operator Interface Terminal (OIT)
- Automatic Fill and Drain
- Selectable Liquid Level
- Low Liquid Level Safety Control
- Aqualift® Power Operated Lid
- Piezoelectric ULTRABRAZE® Ultrasonic Transducers
- Companion Rinse/Dry Consoles Available

SSI engineers and manufactures the 200 series in-house to ensure a quality product and customer satisfaction. If you would rather combine the ultrasonic clean and rinse/dry functions into a single console you should consider our [400 series](#).

Optional Features:

- Instrument Trays
- Instrument Tray Lift
- Detergent Injector
- Tank Heater
- Cannulated Instrument Irrigator
- Manual Lid
- DI Water Hook-Up (R/D consoles only)
- Instrument Lubrication (R/D consoles only)
