

From the clouds came music

Introducing Cloudstream Business Music

Business music from the cloud

Welcome to a new commercial free internet streaming music service for business. Cloudstream offers over 50 different commercial free music stations across all musical genres. Every Cloudstream music station is professionally programmed & fully licensed for playback in businesses. Cloudstream features music from all top name artists and draws from libraries of hundreds of thousands of music tracks. Stations are constantly updated so the music mix is always fresh and up to date. Cloudstream includes all ASCAP, BMI, SESAC and other music licensing royalties...packaged in one low \$29.95 monthly fee...no contacts, no long-term commitments required.

Our cloud has a silver lining

Cloudstream music service is fully commissionable to dealers at a whopping 20%...on a recurring basis. Cloudstream offers dealers the ability to custom brand streams and insert ads into programming...all from a simple user interface, right from your web browser. Let Cloudstream open up a new revenue source for your business.

Stream On!

Cloudstream music service is available over the internet and plays directly from a preconfigured Eos™ streaming music player. All streams are broadcast at a full 128kbps stereo, all that is required is an ethernet connection. The streaming player setup is easy & can be used with a traditional wired music system or go fully wireless with Eos' revolutionary wireless music system.

From the clouds came music...and it was very good!
