

SEEKING TO REDEEM THE POLLUTED STREAM BRINGING BACK ITS GLOW AND GLEAM!

Note, the below is written as though Rotary was massively distributing the revolutionary Moslet toilet, and therewith doing a vital work worthy of donations to extend their efforts. The below could also be written as though Red Cross or Samaritan's Purse were effectively distributing the Moslet, and likewise being rewarded with donations. The unique Moslet toilet was birthed through much passionate research instigated by Google's request for ideas that would help the most people. Gates Foundation likewise has been seeking for a lifesaving waterless toilet.

- BREAKING NEWS -

Rotary Dives Into A Revolutionary Toilet And Comes Out Smelling Like A Rose. Rotary Provides Restoration Of Streams, Rivers As Well As Soil, To Polluted Third World Countries!

Rotary, in addition to its wondrous past humanitarian efforts, is now bringing new sanitation and life to millions living in poverty in third world countries! Rotary through the revolutionary new Moslet Toilet, which can be manufactured and shipped around the world for approximately \$25.00 each, is seeking to supply whole villages with toilets at a time and thus is transforming whole villages in unison. Providing a whole village at once with Moslet toilets gets people's attention and encourages everyone to join the effort and make the change others are making. If people upstream are cleaning up the river, it gives them courage to do the same for those downstream. Such a broad and united effort helps create a landmark of needed change. Rotary first educates and works together with local officials. Five thousand Moslets can be shipped in one large shipping container, making shipping costs per toilet very minimal around the world.

Rotary in its distribution of the revolutionary Moslet, is emphatically seeking to instigate both quality and lasting sanitation. Rotary in their sanitation effort is incorporating effectual techniques of presentation, education, and implementation. The Moslet toilet, together with proper education and implementation, has potential to not only deter much pollution, stench, and sickness but to also in due time provide safe and effective fertilizer and thus greatly improved soil and crops. The Moslet, which features a vital urine diverting and gate system, basically requires no water or chemicals, and yet can be odor free insomuch it can be used indoors as well as outdoors. Thus a mere donation of \$25.00 has potential to wondrously transform the life of a family who has lived in a land of pollution, sickness, and depleted soil. Further the \$25.00 donation not only provides a toilet, but also helps fund its implementation.

Please join the honorable effort of Rotary by providing a mere donation of \$25.00 to the Rotary-World-Sanitation-Drive. Better yet provide a monthly donation of \$25.00 and change the life of a family every month! If everyone in USA would contribute a mere \$25.00 to the effort, more than a 250 million Moslet toilets could be purchased and distributed! If therewith each toilet serviced a family of four, these could provide new life and sanitation for one billion suffering people,

without the donors feeling any real pain in their pocket book, while yet having the satisfaction of having contributed to something very worthwhile. In this project everyone can win, and most of all the poor who need to win, do win!!

Further the Moslet could be life saving in times of crisis in the USA, as well as being an excellent toilet for camping, cabins, or bedrooms of the elderly. Thus Rotary will ship a Moslet toilet to any address in the USA for a mere donation of \$110.00, while therewith also providing a toilet to be shipped about the world. Please join the effort and donate \$25.00, or donate \$110.00 and get your own Moslet as well!

In addition, the Moslet can nicely be incorporated with a much larger waste receptacle, than the included family size receptacle. The large waste receptacle also has the option of a unique earth flush system. Even further, the Moslet, with its vital urine diverting and gate features, can nicely be combined with a dual pit toilet system, providing greatly improved and easier to sustain pit style sanitation. The Moslet earth toilet, is named after the famous Patriarch Moses, as it in a convenient manner, simply incorporates and excels in his sanitation instructions. Christians, Jews, and Moslems alike, all greatly honor the Patriarch Moses. The possibilities of the Moslet earth toilet are earth changing, and may earth arise and capture them!

To learn about the simple yet amazing Moslet Toilet see the below pdfs and video.

Misc notes

The \$25.00 price may need adjusted. The toilet and shipping is estimated at \$17.50 each (\$131,000.00 for a container of 7,500). This would leave \$7.50 per toilet to implement them, which adds up to \$56,000.00 remaining to fund implementing the 7,500 toilets. Hopefully as things progress villages would copy other villages in a sanitation revival, as would greatly deter their past and needless pollution of the land.
