

The (BlockChain) technology behind bitcoin could transform how the economy works
The Trust Machine - The Economist 31 Oct 2015 ()*

Fuzo is a platform that enables Blockchains, Crypto-Currencies, Security and IDentity to be converged on any SIM card.

Our OverlaySIM innovation empowers Feature Phones in Developing Countries to be a Platform for *Financial Inclusion*.

Approximately 2.5B people in the world are unbanked

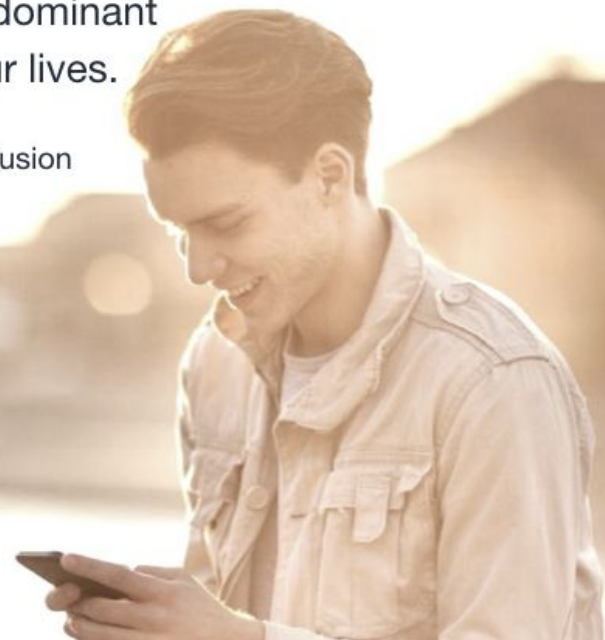

Fuzo enables anybody in the world the freedom to transact in a secure, dependable and transparent way.

Mobile devices are becoming the dominant technology that is impacting on our lives.

Fuzo delivers on the promise of Financial Inclusion

- Identity
- Security
- M-commerce
- M-banking

FUZO[®] PLATFORM

FINANCIAL INCLUSION AS A SERVICE

FUZO.COM @FUZO

Fuzo SIM Overlay: Hardware overlay of SIM creates Virtual SIM platform

- Transportable, secure management of Identity & MNO credentials
- Anyone, Anywhere secure transactions due to increased trust
- In-built authentication empowers the user over traditional workflows

Blockchain Integration

Provides for decentralisation of comms & application logic

- Blockchain = Transactions grouped into blocks and posted sequentially in a chain = immutable historic ledger
- Support for any blockchain means that a decentralised approach by all network nodes, owned, updated and monitored by everyone, controlled by no one

Identity Service

Provides for Verified SIM Accounts while still allowing for a variety of pseudonyms to be used for internet privacy and role based security
