**Note:** seat inserts are normally only used on the exhaust seats because of the "No lead" situation. They are available for the intakes if the valve seat needs to be reclaimed. Bronze guides for the Triumph valves listed are all the same OD 0.502", ID 0.3123", only the length varies: TR50 2.065", TR52 2.435", TR53 2.250". They can be cut for stem seals.
