## YOHANN LIBOT PHOTOGRAPHER

Yohann Libot is a **French photographer** based in Marseille. Born in the North of France, he fell in love with the Phocaeen city during a reportage. Becoming a photographer was very natural since he always had an eye for **good angles**, curves, shapes and a real passion for lights.

His work has been published **in galleries, in magazines, commercial** and his assignment works included **city guides, festival, webzines**.... He also had published his own book about Marseille called "Massilia Civitas". A second book about lost places is on its way.

Nowadays, Yohann travels all around the world, camera around his neck, to capture its beauty : landscapes, instants of life, people... In common in all his photographs ? All of them are in **black and white**, analogic, perfect in their imperfections, real.

You can discover Yohann Libot's work on his portfolio <http://yohannlibot.com/> and Instagram @yohannlibotofficial.
