EE Department Advising, Holds, and Registration Issues FAQ

My Hold was not removed and I cannot register.
- If you met with an advisor, email the undergraduate coordinator, currently david.parent@sjsu.edu.
- If you did not meet with an advisor and classes are still in session, make an appointment here.
- If it is during break, email the undergraduate coordinator, currently david.parent@sjsu.edu.

I submitted my transcripts, but they do not seem to have been processed yet.
You need to turn them in again, and send an email as detailed here.

I meet the requirements for Physics 50 but the system will not let me add (Do not meet pre-reqs.)
- Sometimes Math30PL does not work, please contact the Physics coordinator, currently Professor Monika Kress, monika.kress@sjsu.edu.

I get a “This course is outside of your career error”, but the course is part of your deleted major.
- PHYS 50 (for Example) needs you to complete completed English remediation. Once you earn at least a C in ENGL 1A, your remediation will be met and you will then be able to enroll.

The system is not letting me enroll in ENGR 10 or ENGR 100W (Usually the system is asking for a permission number, or asking for Department consent.)
- For ENGR 100W you need to meet the pre-reqs.
- Sometimes students are not allowed to enroll in ENMGR10 until July 6’th.
- If you are a declared engineering or technology major, this error means that the section you are trying to enroll in is being blocked from open enrollment for some purpose. Keep choosing another section until you can enroll.
- If you are not declared engineering or technology major, you need to get a plan of study from a department will to accept you. Please see the engineering student success center to start this process.
I have met all the pre-reqs for ENGR 100W, but the system does not let me register:

<table>
<thead>
<tr>
<th>Error: Unable to add this class - requisites have not been met.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Allowed Declared Majors: All Engineering, Aviation, Industrial Technology.</td>
</tr>
</tbody>
</table>

- Please see the [engineering student success center](#) to resolve.

I cannot register for EE110, EE112, or EE110L:

- Please read the [EE101 FAQ](#).

I have questions about the EE101 Placement Exam:

All the information related to the EE101 placement exam can be found [here](#):
