

# Stay

---

---

*I'm still awake  
I'm lonely and longing for you  
You come and love me  
Then you leave me feeling empty and blue*

*You are always running, always hiding, always playing a game  
Coming back for more you disappear by the end of the day*

*I want you to stay  
You never stay  
Come on and stay  
I wish you would stay  
But you never stay*

*Don't keep me waiting  
Heaven won't call  
Anticipating  
Come on heaven won't know*

*When I look to your eyes I feel guilty as hell  
I know our love is forbidden but I still don't care*

*The fire in your touch on my skin makes my body shake  
You're coming back for more you disappear more than I can take*

*I want you to stay  
You never stay  
Come on and stay  
I wish you would stay  
But you never stay*

*I want you to stay  
You never stay  
Come on and stay  
I wish you would stay, stay, stay,*

**STAY!**
