

IOS203 – 1-Day Advanced iOS - LBS Programming

In this 1-day workshop, you will learn some of the advanced techniques for writing iOS applications. In particular, this course will focus on writing Location-Based Services applications, allowing your applications to be location-aware.

Topics

- Using the Core Location framework
 - Getting your geographical location
 - Getting your bearings
 - Monitoring a location
- Using the MapKit framework
 - Display maps using the MapView
 - Reverse-geocoding to get the user-friendly address
 - Adding annotations (pushpins)
 - Rotating the map
 - Data logging
 - Location tracking
- Displaying third-party maps APIs (JavaScript)
 - Using the Google Maps APIs
 - Using Bing Maps
 - Using OpenStreetMap

Prerequisites

- Attended the **Fundamentals of iPhone Programming using Objective-C** course

Hardware

- Mac
- *iOS devices (recommended)*

Software

- Xcode 7 or later

About Wei-Meng Lee

Wei-Meng Lee is a technologist and founder of Developer Learning Solutions (<http://www.learn2develop.net>), a technology company specializing in hands-on training on the latest mobile technologies. Wei-Meng has many years of training experiences and his training courses place special emphasis on the learning-by-doing approach. His hands-on approach to learning programming makes understanding the subject much easier than reading books, tutorials, and documentations. His name regularly appears in online and print publications such as DevX.com, MobiForge.com, and CoDe Magazine.
