INTRODUCTORY NOTES

First of all, thank you for purchasing/downloading this E Book. I promise it was worth the price you paid for it! Over the years I have gained experience with numerous ways of making money online. I've tried almost all of them in an attempt to make my life easier. The first thing I'm going to tell you is don't be impatient, it takes a lot of time to set up an online business. So if you're reading this hoping to make a quick buck, forget it! The second thing is don't spend tons of money setting your business's up, as the old saying goes "the best things in life are free", while some things do require a small investment, the majority of online opportunities are in fact free.

A LITTLE HISTORY

I got started making money online about 2 years ago when I was 18. I used to work at a Sports Chalet part time and make about \$200/week. I lived in a two bedroom apartment with three other guys and was buried under school loans and credit card debt. I currently reside in Newport Beach, CA in a beach front house and attend the University

of California, Irvine where I'm studying Economics with an emphasis on business. I now make on average \$2000/week, all with the methods I use below. I have no debt whatsoever and recently purchased 2007 Subaru WRX STI custom, purchased with the money I've made.

RESELLER RIGHTS

By purchasing/downloading you are given full redistribution rights and are allowed to keep any of the proceeds the follow. **The only restriction is that you cannot modify this E-Book in any way.** If it is discovered that this edition has been modified the responsible party will be prosecuted under current intellectual property copyright laws. **To date I have prosecuted 8 different parties.** DO NOT EDIT!

ABOUT THIS E-BOOK

This guide eliminates all the fluff that most other E-Books have brought to the market. **I'll provide you with 10 easy ways to make money online** without spamming you with scam sites that steal your money and leave you in the same spot you started. The links I provide are valuable resources that I have utilized in creating my little money making empire. Some do require a small investment, but the majority don't. Not only will I show you 10 different ways, but **I will also show you how to promote your online Businesses absolutely free!** This guide is very straight forward, there will be no embellishing! If you want a real E-Book about making money online, this is the only guide you will ever need. I keep it short and simple with easy steps that anyone can follow. Hundreds of people have purchased this E-Book, many of whom have amounted huge profits utilizing these methods. I provide you with everything you to get started making money in as little as 5 minutes! **NO SCAMMING!! NO BS!! 100% SATISFACTION GUARANTEED**

Section 10.....	Paid Surveys
Section 11.....	Promoting/Marketing

Section 1 – Online Stores

When it comes to creating an online store, there are many different routes you can take. I have had the most success with [Zlio](#), [Cafe Press](#) and Yahoo! Merchant Solutions. Zlio and Cafe Press are completely free while Yahoo! does charge a small fee. I started off with Zlio and after I opened all the stores I could with that I did the same thing with Cafe Press. I STRONGLY RECOMMEND starting your online adventure with Zlio, it's by far the easiest to set up. Below are in-depth explanations of each service and what they offer.

Create a Zlio Store

[Zlio](#) allows you to create up to 20 different stores each offering up to 1000 unique items. Choose from over 6 million name brand products, including iPods, iPhones, Playstation 3's, Flat-Screen TV's from thousands of top merchants like Newegg.com, buy.com, and even the Apple Store. Choose from about 20 free templates or create your own to customize your store the way you see fit.

[Zlio](#) is by far my favorite when it comes to creating an online store. It's how I got my start in the world of making money online. My Zlio stores now generate over \$1000/month and that number grows every month. [You can visit one of my example stores by Clicking Here!](#)

Create a Cafe Press Store

[Cafe Press](#) allows you to design your own logos and “press” them onto almost anything and sell them in your store. Your logos can be pressed onto shirts, mugs, mouse pads, stationary, posters, stickers, etc, and you sell them at a marked up price that you choose. It's a completely free service, all you have to do is design a few logos or you could even download any design you like off the internet. Just don't violate copyright laws! I have about 5 different Cafe Press Stores each

selling unique artwork in different categories. If you're an artist and you want to make some money, put your art on a shirt and sell it to your friends. It's extremely easy and there's nothing to lose considering it's free. [Visit Cafe Press Today to Start Your Own Store!](#)

Yahoo! Merchant Solutions

[Yahoo!](#) has created an amazing service to allow anyone to create the online store of their dreams, although it is the last route I would go. I recommend creating a Yahoo! store only if you have something to sell. With Yahoo! Merchant Solutions you can choose professional designed templates, easily choose the layout of your store, upload custom logos, implement CSS to customize further, and even create an easy to use checkout system. The only drawback is that it's \$40/month. If you're just starting out, I don't recommend Yahoo!, start off with the other 2 FREE options, and wait till you actually generate income before you start thinking too big.

Section 2 – Selling on eBay

[eBay](#) is one of the most popular sites on the internet and personally one of my primary money makers. Millions of people visit everyday searching for items they can't find elsewhere. eBay is a resellers paradise, when you visit eBay you may notice that almost all the items are sold at discount prices, half as much as the retail counterpart. I know I've asked "how do they even make a profit?" Well, the answer is wholesale. Most resellers on eBay purchase their goods through wholesale, liquidation, and drop-shipping websites

tucked into the corners of the internet. If you look close enough you can find sites out there that offer thousands of products and low prices. I have found an easier way!

SaleHoo

Salehoo is an online directory of wholesalers, liquidators and even drop shippers with online reviews of each company from customers just like you. It is by far one of the best tools I've used; it allows me to search thousands of companies for the item I'm looking for at the best possible price. If you're going to consider selling on eBay, I recommend getting **SaleHoo**. I stumbled upon it after a long search for quality wholesalers. Also if you're going to become a reseller make sure to consider drop shipping. It's by far the easiest way to sell. The way it works is you list an item marked up from the drop shippers price. When a customer purchases that item, you place an order with the drop shipper, pay them and keep the profit. For anyone who is serious about selling on eBay, SaleHoo is a great resource. It eliminates all the scammers, all wholesalers, drop shippers, and liquidators and pre-screened before they are placed on the site. It is 100% safe and comes with research tools, and great customer service. **[Click Here to get a Lifetime Membership to SaleHoo through this limited offer!](#)**

Auction Inspector

Auction Inspector is a tool that I have come to love. I put off purchasing it for quite a while when I was getting started. My sales were slow so I decided to try something new. Within the first week of purchasing Auction Inspector my sales increased by 300%. I was able to find niche products that were in huge demand, but were hardly supplied. That's what this tool does; it searches eBay with keywords you use and determines niche items. You can search any eBay site worldwide! I highly recommend this excellent program if you want to become a power seller! [Click Here to Download Auction Inspector!](#)

eBay Affiliate Program

eBay has an affiliate program which many people utilize to create an extra stream of income. The affiliate program enables you to promote eBay listed products in exchange for a healthy share of eBay's revenue for each sale that you refer. The first thing you need to do is create your own website to display products from eBay. There are a couple of methods you could use to accomplish this. You could create your own from scratch, I only recommend this if you have a background in web design. If you don't you could use Yahoo! as described in Section 1 to get one up and running. Keep in mind though that Yahoo! will cost some money up front and doesn't guarantee that you'll generate traffic/customers. [The method that I recommend is BAN's \(Build a Niche Store\)](#). This is a great program which makes a website for you. This is one of the ways I make

\$2000/week without lifting a finger. It does all the work for you and you're ready to make money online in a matter of moments. It's an amazing program and I highly recommend it to anyone who's interested in joining eBay's Affiliate Program. [Click Here to get started building you Niche Store!](#)

Section 3 – Selling on Amazon

[Amazon.com](#) is one of the leading online merchants; its right up there with eBay and for good reason, with millions of visitor's every day, Amazon is in the Top 15 most widely visited sites on the internet. I have used Amazon for number of years, not only to sell merchandise, but also to buy. There are many different methods you can use to create some extra income. Below are a couple that I still use to this day.

Selling Text Books

The first and my personal favorite method I'm going to explain to you is selling textbooks through [Amazon](#). I've done this for a number of years, since I've came to college and still do it occasionally to this day. It does take a little work and you need somewhat decent people skills but the profit margin is very high and it's worth the effort you put in. Essentially the more you put in, the more you get out. There are two methods you can purchase cheap textbooks to supply your stock. The first way is to scavenge your local yard sales. This where you'll find the real bargains, but there's a downside, there's no way you can research and look up the ISBN to see the book is selling for on Amazon

(unless you have an internet phone☺). Essentially you may buy a book for a couple of bucks only to find out that it's selling for fifty-cents. If you don't want to risk that you may want to consider my second method. [Craigslist is one of the premiere online swap meet sites that is absolutely free!](#) With over 10 million visitors a day you're bound to find what you're looking for. Craigslist is an invaluable resource which I use on a daily basis. Do a search of textbooks for sale in your area. You could spread out the search as much as you want. I usually keep it within 20 miles only if the potential profit of textbook is worth. For example, don't drive 15 miles when you're only going to make a \$5 profit. The first thing I do when I find a suitable textbook is research the lowest selling price on Amazon to insure that it will get sold. I then calculate the highest price I'm willing to pay based off the Amazon price and send an email to the seller introducing myself and stating the price I'm offering. I also mention that I'd be willing to come and pick it up for free minimizing the work on their part. Sometimes they refuse and I re-negotiate, but most of the time they just want to get rid of the thing and agree to my low price. Selling textbooks can be tedious; it's a matter of weighing the cost vs. profit. Try to buy in bulk, usually if you can take all of the textbooks off a sellers hands they will offer you a lower price for the convenience.

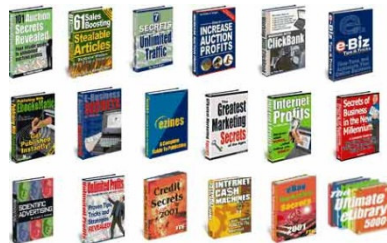

[Amazon Hunter](#)

[Amazon Hunter](#) is another great tool that does all the work for you. It's only useful if you decide to sell on Amazon or you're a member of their affiliate program. How it works is it searches Amazon for

products that are not being promoted with Google Adwords and suggests product specific keywords (keywords that people type in when they are ready to buy.) It's a great idea to implement these keywords into Adwords and create target specific ads with the keywords found with Amazon Hunter, this guarantees that whenever someone clicks on one of your Google ads they'll buy the product giving you a nice little commission. The work that it takes to get Amazon Hunter going for you is a not less than say selling textbooks, the only drawback is that it does cost a little to get started. [Click Here to get started with Amazon Hunter!](#)

[Section 4 – Selling E-Books](#)

E-Books are growing in popularity every day, thousands of companies are now printing their media digitally to reach a wider audience over the internet. This new form of media has created an underground market which allows anyone to publish their intellectual property for the world to view. This new market is full of thousands of opportunities and the great thing about it, you can make tons of money if you have an idea and you're motivated. I've written over 20 mini E-Books on a variety of subjects and I've been able to sell most of them. Below I list a couple methods to help you get started on your way to making money with E-Books.

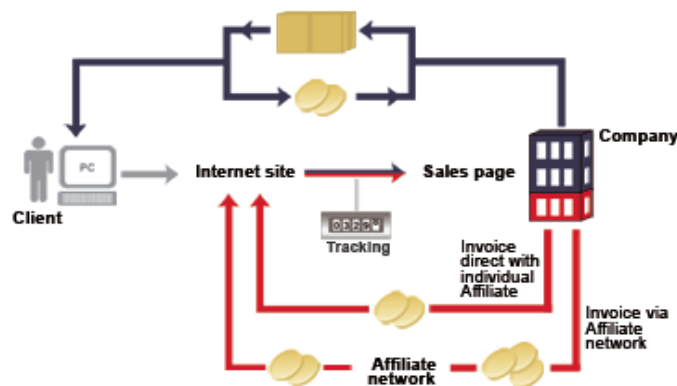

Publish Your Own E-Book

If you have an idea or you have special knowledge that may be valuable you may want to consider publishing your own E-Book. If you don't know how, you can't type, or even if your grammar isn't that good you may want to take a look at [How to Write and Publish your own E-Book in as Little as 7 Days](#). It's a great little program that can assist you in creating your E-Book. The profit margins for E-Books are extremely high, no shipping fee's, no printing fees, it's all digital! You can make money on "autopilot" 24 hours a day!

Selling E-Books on eBay

One of my personal favorite methods of making money online! There are different ways you can go about doing this. You can sell books that you publish; you can resell books which you've purchased if they allow it. You can even resell this E-book as long as you don't edit it. I've also included 5 valuable books so that you can start reselling right away. When listing your E-books on eBay make sure to write an in depth description about your E-book, include pictures to grab the viewers attention and entice them to read on. Try selling your E-Books in a variety of categories testing to see where they sell better. Change the pricing to see what buyers will pay for it. I recommend keep the price lower at first until you have a good amount of feedback, feedback is the backbone of eBay. Also, come up with an eye catching title and include a picture of the E-books cover. The great thing I love about selling an E-book is that it's all profit, no shipping fees since you deliver it by email or an external download link.

Section 5 – Affiliate Marketing

Affiliate marketing is one of the most profitable ways to make money on the internet. This method is a little bit more complicated than the others but it's worth understanding. Many consider affiliate/viral internet marketing to be the way of the future, over 3 billion people access the internet for business or personal reasons. Consider the internet as a giant pie, anyone can grab a slice if their hungry enough.

How It Works

There are a couple of sites out there in which company's supplying products sign up for. Regular people like you and me sign up with these sites as promoters. The premise behind this is that we (affiliate marketers) choose the products we want to promote and if we actually create a sale we get paid a commission, usually around 50-75% of the sale price. Essentially you're getting paid to sell other peoples products.

THE 2 BEST AFFILIATE MARKETING SITES ARE:

CLICKBANK

And

PAY DOT COM

The great thing about these sites is that you choose the products you want to promote, if you think you'd be better specializing with one

product then go right ahead. There's no obligation to sell anything else. All of the money you make goes directly into your account and you can either choose from receiving a check every day or you can have it directly wired to you through PayPal.

Promoting Your Products

There are many different methods you can use to promote your products. One of the best ways to generate some traffic to your referral links is to create direct links with Google Adwords. It does cost a little but you will get people looking to buy. The trick is to use specific keywords to attract targeted buyers. DO NOT use too many keywords, this will attract useless traffic and cost you more. I've made that mistake in the past.

[Get FREE Google Adwords CLICK HERE!](#)

Google Adwords is only one way to promote your products. I also use **[SEO Elite](#)** which is a great piece of software that optimizes your webpage for search engines making it more visible to internet users.

[Click Here to Download SEO Elite!](#)

You can promote you link using the free classified as sites and etc. like I mentioned early. It is a lot harder though because it's harder to focus in one an interested demographic. Using **[USFREEADS.com](#)** is a great method of getting your product out there. I suggest you sign up for the premium membership though because they're ads are always on the front page, so you will get by far the most views.

[Click Here to Sign Up with USFreeAds.com](#)

[Section 6 – Blogging For Cash](#)

Blogging is one of the easiest ways to generate some cash flow on the internet with very little work. It's extremely simple and only consists of three steps. (1) Create a Blog (2) Implement Google AdSense and (3) Generate Traffic.

Setting Up Your Blog

The first thing you need to do is start a blog. It could be about anything, your daily life, a hobby, electronics. A blog is basically a journal/diary on topics that interest you. To start a blog go to Blogger.com, its hosted through Google and its completely free. The next thing you need to do is choose a topic, choose something interesting to generate some traffic. The more traffic you generate the more cash that goes into your pocket. Next, implement Google AdSense, this is where you income will come from. Blogger.com can easily add it in when you create a new page element. It takes a couple of days you get your account verified but once you are you can start making money. At first, you won't be making that much, but once your traffic increase, so will your revenues.

Promoting Your Blog

Generating traffic to your blog is probably the hardest part when creating a blog. There a couple ways you can do this. First I recommend pinging you blog. This will update search engines including you blog in their results. Do this each time you update your blog. Some good ping sites are Pinggoat.com, Autopinger.com and Blogsearch.google.com/ping.

Another great way to generate traffic to your blog is through RSS Feeds. RSS is a format for delivering regularly changing web contents. Many news-related sites, weblogs and other online publishers syndicate their content as an RSS Feed to whoever wants it. It allows anyone to easily stay informed by retrieving the latest content from sites their interested in. I've listed some great RSS submission sites to help you get started below.

www.MasterNewMedia.org/rss/top55/

www.RSS-Specifications.com/rss-submission.htm

You can also add other sites RSS Feeds to your site so that you always have the most up to date popular content. This is a great way to constantly add more traffic because it keeps the hot news on your site. With blogs you can generate as much as \$20 per day. If you have multiple blogs you can generate 3 or 4 times that without having to do anything!

Get Paid to Blog

You can also get paid just for writing about topics that interest you! If you are a dedicated blogger, and like to write, you can easily make \$600 or more each month. Even if you aren't you can Copy Free Articles to the site and make money out of nothing. Use Google to find free article databases.

[Click Here to Get Paid to Blog](#)

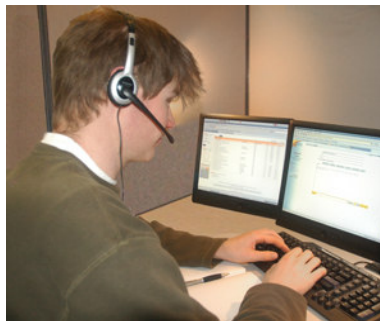

Section 7 – Writing How-To Articles

Blogging is not the only way you can get paid to write articles online. There is a great little site known as eHow.com which pays you to write “How-To” articles on any topic under the sun. If you have special knowledge on a subject, submit a “how-to” article and watch your revenue increase as people read and rate it. The more helpful your article, the more you could get paid.

[Click Here to Started with eHow.com](#)

Section 8 – Data Entry Jobs

The best thing about Data Entry Jobs is that your basically getting paid to type, it’s as simple as that. If you’re talented with a keyboard and can type 40 words a minute or more you may want to consider this as a part time job. You don’t need to spend that much time doing it either, you can spend as little as 20 minutes a day in your spare time. I tried this when I first started out, it’s a great way to begin your online money making career if you don’t want to make a website or list on eBay.

How It Works

Hundreds of thousands of companies have electronic forms they need to fill out. They don't have the manpower to do it themselves so they contract jobs out to individuals for hire. The pay varies but I've seen people make anywhere from \$300-2000 per day. This is a get rich quick scam, it's an actual jobs you get paid for. Consider yourself a contractor for these companies, all you need to do is set aside an hour or two and you can make a whole living on the side! You can start making money in as little as 5 minutes after signing up. I've listed a few great data entry site below!

MyDataTeam.com

[Real Colleagues Data Entry Partnership](#)

These jobs are starting to become very popular among the online community. I suggest the sooner you sign up, the better!

Section 9 – Take Pictures for Money

This is a great opportunity if you love to take pictures. This company will pay you as much as \$250 per day and you also have the opportunity to earn monthly residual income off every photo that you submit. That means whenever someone uses your picture you receive

a royalty! You DO NOT have to be a professional photographer, all you need to do is capture images of everyday life and things that interest you! Over 18,000 people have capitalized on this great system. You don't need any special printers or expensive photography equipment because all the pictures that you take are uploaded directly to their website. This is one of the easiest ways to make money online if you love to photograph or just have tons of digital photos taking up space on your computer.

[Click Here to Start Making Money by Taking Pictures!](#)

Section 10 – Paid Surveys

Paid Surveys are exactly what they say they are. You get paid cash, deposited directly into your PayPal account for every survey you qualify for. The more surveys you complete the more money you make. Many people believe these surveys are scams, I did to before I tried it. My first survey pocketed me a cool \$5 and I was hooked after that. Don't be fooled though, there are some sites out there that are set up to look legit, but in fact they aren't. Make sure to do your research and read reviews on each survey site you come across.

How It Works

Thousands of company's want to hear what consumers think about the products and services they provide. There are many "portal" sites that connect companies with consumers, these are the survey sites we've grown familiar with. All you have to do is fill in your information, its best to use accurate information so research companies can send you specialized surveys directed toward your demographic. If you use different information every time you sign up for a survey, it becomes harder and harder to qualify for them. That's what I did, I used different information and I was never able to actually take the survey, when I started using accurate information more often I qualified for more and more surveys. You can get paid to do a number of activities through paid survey sites including shopping, eating, driving your car, trying new products, traveling, watching movie trailers and lots more. This is a great and easy way to get started with your online career from home, it sounds like a joke I know but I guarantee you will generate a good income from this. I made \$300 my first month alone. I've listed some great paid survey sites below, feel free to check them out!

[NPD Online Research](#)

[Paid Surveys ETC](#)

[Survey Scout](#)

[Paid Surveys Online](#)

It's your choice with how much effort and time you're willing to put in to complete these surveys. The more time you spend the more money you get out. Don't let the signup fee's detour you trying each opportunity out. Any money you spend is refundable within 8 weeks. There's very little risk and potential for huge rewards!

Section 11 – Promoting/Marketing

Generating traffic to your links is one of the hardest things to do when it comes to creating a website or anything you want to promote. Here are a few simple ways which I have utilized in the past and present to gain popularity among people using the internet. Keep in mind that most of the methods are free but do require a bit of effort on your part, I promise it will pay off if you stick with it. I've also include a couple links to sites/programs that do require a small fee in order to utilize their features, they too are also worth the price!

Directory Listings

This is an age old method that some have abandoned, but it still works. Remember, the objective here is to build traffic, so if you seriously want it, put your link in as many places as possible. By directory listing, you are getting one-way links back to your site which is a great thing and improves your PR. Not your traffic, but PR is a way to get your on Google's top pages and therefore more traffic. Reciprocal links are not the best way, but if you are brand new, sometimes you have to do it. If you can do one-ways it is much better. Search engines put a higher ranking on one-way links, so concentrate on those.

Link Exchanges

Again, reciprocal link is not as highly rated, but it is still very effective. You need to exchange links with as many websites as humanly possible and for best results make sure they are RELEVANT!!! What this means is it's not a good idea to have a recording studio site and have a lot of links exchanged with a food site. It is a good idea for a recording studio to be exchanged with other music related sites though such as CD mastering, mp3s, other recording sites, etc... This shows a great deal of relevance with search engines. One key, do not

name your links page "links.html" or anything of the sort...it's a dead give away to search engines and they do not appreciate it. Be creative, recording-studio-resources.html or something like that. Note, no more than 50 links on a page!!!

Article Writing

This has proven as of recent to be a great method to produce traffic. The goal here is to get both one-way links (on some sites) and traffic in an all-in-one step. Here's the key to writing good articles, you must spin every article you write. What this means is change the articles. There are many great article spinning software programs out there that I have used. I am now a "Expert Author" in hundreds of sites and have submitted my same "Spinned" article over and over. Each article generates traffic too...that's the beauty. There is a key to all of this though, never over submit because you could potentially SPAM your site and cause it to de-index or lose PR ranking.

Online Forums/Communities

Forums and online communities are a great method you should take advantage of. They allow you to target a certain group that fits the audience you are looking for. With online communities and forums you can build trust and a good reputation by showing your range of expertise in a specific subject. The more valuable your posts are the more likely you are to get potential customers visiting your site.

Newsletters

You can use a newsletter to provide people with a catalog of your products and you can also entertain them with articles and other information pertaining to your specific audience. Make sure your newsletter is interesting and entertaining that way more people will sign up and you will have more people to market your product or service to.

Craigslist

With Craigslist, you have a chance to advertise on some of the biggest classified pages in the world. Millions of readers in more than 20 countries visit Craigslist to find apartments, look for jobs and buy products and services. Best of all, Craigslist is a free service.

Adwords

This process does cost a little but you are guaranteed traffic. Make sure to use specific keywords related to the products your advertising so as not to waste too much money. Use the keyword research tool to create top searched words to maximize profit.

eBay

Believe it or not you can advertise on eBay, you just have to list it in the right section. I advertised my Zlio websites under the Totally Bizarre section under Weird Stuff. It costs 35 cents but you guaranteed some traffic. I post listings regularly to guarantee visitors!

Mailing Lists

You can actually purchase email lists through companies and start an email campaign to advertise your websites. You can reach millions of potential customers, just don't get added to the SPAM section!

Blogs

Blogs are easy to create and free to start. Creating blog about your businesses is a great way to promote your products and services. You can create a customized domain name and submit it to hundreds of blog databases. You can set one up in a matter of minutes. Refer to my section on blogs for links to how to create a blog.

CLOSING STATEMENTS

Well there you go, 10 ways I use to make money online plus 10 ways to promote your business online! I hope the information I've provided will help you on your way to becoming an Internet Entrepreneur and set you free from the daily grind. It has certainly done that for me! Please send any questions or comments to my email! It's internetentrepreneur87@gmail.com
