LUNCH-AND-LEARN

Program Date: Wednesday September 15, 2010

Program Title: **Masonry For Sustainability**

Time/Length 12:00 noon / 60 minutes

Location: Legat Architects
24 N Chapel, Waukegan, IL 60085
(contact Kelly Krampitz (847) 406-1151; kkrampitz@legat.com)

Learning Units: Registered with AIA for 1.0 LU
Registered with AIA for 1.0 Health Safety Welfare (HSW) LU
Registered with AIA for 1.0 Sustainable Design (SD) LU
Qualifies for GBCI LEED AP credential maintenance, self-reporting
Certificate of Completion provided for non-AIA member self-reporting

Cost: No charge

Meal: Lunch provided by IMI

Presenter: Scott Conwell, AIA, CDT, LEED AP
Illinois Director of Market Development, International Masonry Institute

Program Description: Masonry materials can be used to create buildings with significantly less impact on the environment than many other materials, often yielding immediate and measurable results toward sustainability. Brick, stone, tile, terrazzo, marble, and plaster are known for their beauty and performance value, and these same materials also play an important role in addressing the requirements for up to 52 points in LEED v.3 (also known as LEED 2009) certified projects. This seminar will identify the specific contributions that masonry makes in the area of Sustainable Sites, Energy & Atmosphere, Materials & Resources, Indoor Environmental Quality and Innovation & Design. The program will also address the new requirements in LEED v. 3 and how they differ from those in LEED v. 2.2.

AIA Provider Name: International Masonry Institute

AIA Provider No. G390

AIA Program No. 001M10
