

14th International Conference on Fracture
June 18-23, 2017
Rhodes, Greece

Special Symposium Second Announcement

ANALYTICAL AND NUMERICAL METHODS TO SOLVE OF SOME NEW PROBLEMS OF FRACTURE MECHANICS

organized by

Vyacheslav Bogdanov

S.P. Timoshenko Institute of Mechanics, National Academy of Sciences of Ukraine, Kiev, Ukraine

Roman Kushnir

Ya.S. Pidstryhach Institute for Applied Problems of Mechanics and Mathematics,
National Academy of Sciences of Ukraine, Lviv, Ukraine

The main objective of this Special Symposium is to provide a comprehensive forum for researchers to present their discoveries and findings in the development of analytical and numerical methods for the solving of current problems of fracture mechanics. It provides a forum emphasizing the importance of both theoretical and applied approaches with the aim of improving the knowledge base in fracture mechanics to help solve the worldwide ever growing challenges in environment.

The topics of interest include, but are not limited to, the following sessions:

- Cracks in Inhomogeneous structures
- Fracture analysis of solids under different loadings
- Dynamic and non-stationary analysis of solids
- The technological aspects of fracture mechanics

The organizers of this Special Symposium are pleased to invite prospective authors for the submission of their abstracts by **October 31, 2016** through the conference website (<http://www.icf.org>) and assign the abstracts to our Symposium. If you have any questions, comments or suggestions regarding this Symposium, please contact us: Prof. Vyacheslav Bogdanov (bogdanov@nas.gov.ua) and/or Prof. Roman Kushnir (dyrector@iapmm.lviv.ua).

We are looking forward to seeing you in Rhodes!
