

September 8-11, 2015, Luxembourg

Track Program Committee

- Filippo Arrichiello, University of Cassino, Italy
- Ian Baldwin, JPL Robotics, USA
- Aman Behal, University of Central Florida, USA
- Karsten Berns, University of Kaiserslautern, Germany
- Geoffrey Biggs, AIST, Japan
- Andreas Bihlmaier, KIT, Germany
- Jan Broenink, University of Twente, Netherlands
- Davide Brugalì, University of Bergamo, Italy
- Luca Carlone, Georgia Tech, USA
- Saadia Dhouib, Institut CARNOT CEA List, France
- Leonid Freidovich, Umeå University, Sweden
- Antoni Grau, Universitat Politècnica de Catalunya, Spain
- Alvaro Hernandez-Alonso, University of Alcalá, Spain
- Gerhard Kraetzschmar, HS Bonn-Rhein-Sieg, Germany
- Daniel Kubus, Technical University of Braunschweig, Germany
- Giovanni Legnani, University of Brescia, Italy
- Matthias Lutz, HS Ulm, Germany
- Claudio Melchiorri, University of Bologna, Italy
- Bruce MacDonald, University of Auckland, New Zealand
- Cyril Novales, L'Université d'Orléans, France
- Bruno Patin, Dassault Aviation, France
- Dariusz Pazderski, University of Poznan, Poland
- Ulrik P. Schultz, University of Southern Denmark, Denmark
- Serge Stinckwich, University of Caen-Lower-Normandy, France
- Cristina Vicente-Chicote, Universidad de Extremadura, Spain
- Andreas Wortmann, RWTH Aachen, Germany
- Sebastian Wrede, University of Bielefeld, Germany

Call for Papers

Track 7. Intelligent Robots and Systems

Track Co-Chairs

Marina Indri, Politecnico di Torino, Italy, marina.indri@polito.it
 Christian Schlegel, Hochschule Ulm, Germany, schlegel@hs-ulm.de

Focus of the Track: The aim is to gather researchers and practitioners to report on recent achievements and on requirements in the development of real-world robotic applications, robot prototypes, intelligent embedded systems, robot programming, applications of artificial intelligence, cognitive science and signal processing in robotics, as well as benchmarking and usability studies. Papers shall explicitly put their contribution into the context of technology readiness levels (definition of TRLs as in the H2020 work program). Authors need to explain which raise of a TRL their contribution enables.

Topics within the scope of the track

- Navigation, Control and Manipulation for Intelligent Robots and Systems
- Cognitive Robotics and Integrated Intelligence
- Cooperative and Collaborative Robotics, Networked Robotics
- Perception, Environment Description and Map Building
- Human-Robot Interaction
- Intelligent Robot Assistants and Intelligent Embedded Systems
- Multi-Agent Systems and Distributed Robotics Architectures
- Path Planning and Collision Avoidance
- Sustainable Robotics and Applications
- Robot Programming
- Mobile Manipulation
- Training and Education in Industrial Robotics
- Advanced Sensors and Vision Systems in Robotics
- Robot Learning
- Simulation and Models for Robotics
- Advanced Applications of Autonomous Robots
- Supervision, Planning and Failure Recovery

Aim: The aim of the conference is to bring together researchers and practitioners from the industry and academia and provide them with a platform to report on recent advances and developments in the newly emerging areas of technology, as well as actual and potential applications to industrial and factory automation.

Solicited Papers: Research papers reporting on new developments in technological sciences. Industry and development papers reporting on actual developments of technology, products, systems and solutions. Tutorial and survey papers. Work-in-progress papers. In addition, ETFA 2015 solicits special session proposals to stimulate in-depth discussions in special areas relevant to the conference theme. Please consult the conference web page for more details.

Conference Format: The conference will comprise multi-track sessions for regular papers, to present significant and novel research results with a prospect for a tangible impact on the research area and potential implementations; work-in-progress (WIP) sessions; panel discussions on the state-of-the-art and emerging trends, involving leading experts from industry and academia; and public discussion sessions moderated by leading experts in the field of industrial automation systems.

Submission of Papers: The working language of the conference is English. Two types of submissions are solicited. Long Papers – limited to 8 double column pages in a font no smaller than 10-points. Work-in-Progress and Industry practice papers – limited to 4 double column pages in a font no smaller than 10-points. Manuscripts must be submitted electronically in PDF format, according to the instructions contained in the Conference web site.

Best Paper Award: Best paper awards in Factory Automation and Emerging Technologies will be presented at the conference banquet dinner.

Further Information: ETFA2015 Conference Secretariat: Tel.: +352 / 46 66 44-5810; Fax.: +352 / 46 66 44-5200; Email: etfa2015@uni.lu

Paper Acceptance: Each accepted paper must be presented at the conference by one of the authors. The final manuscript must be accompanied by a registration form and a registration fee payment proof. All conference attendees, including authors and session chairpersons, must pay the conference registration fee, and their travel expenses.

No-show Policy: The ETFA2015 Organizing Committee reserves the right to exclude a paper from distribution after the conference at IEEE Xplore if the paper is not presented at the conference.

Author's Schedule:

Deadline for submission of regular and special sessions papers:	March 15, 2015
Notification of acceptance of regular and special sessions papers:	May 15, 2015
Deadline for submission of work-in-progress papers and Industry practice:	May 20, 2015
Notification of acceptance of work-in-progress papers and Industry practice:	June 20, 2015
Deadline for submission of final manuscripts – regular and special sessions:	July 1, 2015
Deadline for submission of final manuscripts – work-in-progress papers and Industry practice:	July 1, 2015
