## **Interests**

I consider myself a constant consumer of Audiovisual content: from TV series to music and cinema. Gamer since I was a kid and interested about game development since I was a teenager. I've always been a very self taught person, which combined with the theoretical knowledge I've learnt assisting to the university (modern art and design) makes me very polyvalent. Curious and creative by nature, I love to stay up in touch with what happens in the world by reading news and taking part of it.
