Wonderful insights and lessons are often forgotten or unused because they are lost in the overwhelming flood of information and facts. But here's a course that not only unlocks the riches of the New Testament but gives tools and handles to recall the information when you need it most. You'll get a good grasp of the NT, its context and main content, see how relevant and pertinent they are for today's world, and more - appropriate lessons and applications that deal with the specific issues and problems that you (and others) face constantly.
