Dear Generous Donors-

Thank you for your generous donation of a Danfoss DLX 4.4 UL inverter for our solar energy system school project. This project has taken a long time (our parents bought the solar panels quite a few years ago), but with your contribution and wonderful, knowledgeable help from the David Martindale family, we are now generating a part of our household electricity! We learned a lot about renewable energy and enjoyed working with our dad, brother, and sister and the Martindales to help install this system up on the hill behind our house. Please see the pictures below for some details. Thanks again!

Liesa and Laura Caswell (ages 16 and 13)

Liesa helped carry four of these units up the hill!

Measuring to mount the unit at the right angle.

Dad and Joe fastening it to the fence posts.

Laura screwing the units together.

Is this right, Dad?

There! The solar panels are all mounted.

Beginning to wire the panels together with friends to help.

Hannah caulking to keep the water out.

Fastening the wires in place.

Meanwhile, the electricians are wiring the inverter inside.

Hmmm. We're glad that Mr. Martindale is here.

A job well done. Thanks, everyone!
