Nexgrid® Announces Participation in the 2016 ElectriCities Annual Conference

Fredericksburg, VA. August 8, 2016 - Nexgrid, a leading provider of advanced metering and smart grid infrastructure based on open-standards, announced that they will be participating in the 2016 ElectriCities Annual Conference in Concord, NC on August 11-13, 2016.

“We are excited to be exhibiting at the ElectriCities Annual Conference this year. As a leader in smart grid solutions with a large number of customers in North Carolina, Nexgrid is a natural fit for this event. We are proud to be demonstrating our smart technology and introducing new products and software features.” said Costa Apostolakis, Chief Executive Officer at Nexgrid .

About ElectriCities of NC

ElectriCities is comprised of members including public power communities in North Carolina, South Carolina, and Virginia. The conference is structured to discuss topics that are affecting public power communities across the state. Additionally, attendees are presented the opportunity to network with other power leaders. Attendees are also given the chance to demonstrate what they are doing regarding public power.

About Nexgrid

Nexgrid, LLC is a US based company that provides an end-to-end solution for wireless smart grid and advanced metering. Nexgrid’s products provide utility companies and consumers the ability to manage and monitor their smart grid and smart home networks. Their solutions utilize high speed, 100% standards-based communications providing real-time data that enables energy management and utility operations. In addition to advanced metering of electric, water and gas, Nexgrid manufactures load control devices, capacitor bank controllers, thermostats and street light control hardware. Lastly, their ecoOne enterprise software provides meter data, network, load control, street light, outage and customer portal management all in one easy to use platform.
