

PERSONALITY DESCRIPTIONS

WINTER – SPRING MELANCHOLIC - SANGUINE T4/1
aka FIRELIGHT WINTER, CLEAR, BRIGHT WINTER

The Winter-Spring is both reserved or withdrawn and able to be quite friendly, at times. They seem to have emotional extremes, but also to be gifted artists. This is a fascinating, yet difficult and sometimes confusing combination of nearly opposites within a person's nature. But when balanced, this can be a very effective person, who is enjoyable to be around. It just may be a challenge to achieve this balance.

As secondary Spring/Sanguines, they have an attractive ability to be friendly, light and spontaneous, but it seems intermittent because it is often controlled by the more cold, aloof aspect of their dominant Winter/Melancholic nature. It is like they have a critical parent, ruling an inner child with rules and judgment. This causes them to have some insecurity socially as well.

FIRELIGHT WINTER – (Winter with Spring blend) Your hair color may be blonde, almost white blonde or light (or even dark) brown, silver or pure white, looking like a Spring, but they have a more aloof Winter air. They also have Winter contrast. Skin will have strawberry undertone and will have light bisque complexion. Eyes will have winter spokes, or dark lines around the iris, in sparkling blue, brown, tan, cool blue, bright hazel or gray eyes.

Note: Eye color and pattern can show your secondary and hair color is random enough that it should not be an overall determinant. Winter hair should be cool and bright.
