The C3530n MFP is driven by a 200 MHz CPU, and while there's no fax, there is color print, copy and scan. It uses toner-based LED-array imaging technology, which OKI says tends to be more reliable than laser-imaging technology (backing up this claim with a five-year warranty on the LED print heads). Paper-handling is more versatile than others in this class: via the bypass tray, users can print on up to 110 lb. index stock and on banner sheets up to 48" in length. Original scanning is up to 8.5"x14" (legal).

| Strengths  | Limitations   |
|--|---|
| •Scan to e-mail with LDAP support, FTP, network folders and to PC.<br>•Print on banner sheets up to four feet in length via bypass: other paper sources accept up to 8.5"x14" paper.<br>•10/100BASE-T Ethernet network interface.<br>•128 MB memory expandable to 320 MB.<br>•Print on up to 110 lb. index via manual feed.<br>•Paperport scanning software and OmniPage OCR software.<br>•Capable PrintSuperVision network management.<br>•Color-management software, setup tools, TWAIN scan driver, job accounting. | •Microsoft Windows GDI printing (no PCL or PostScript print driver). With Windows GDI printing, print-job processing is dependent on the host PC's resources.<br>•Relatively high color consumables' cost per page of 16.4 cents. |

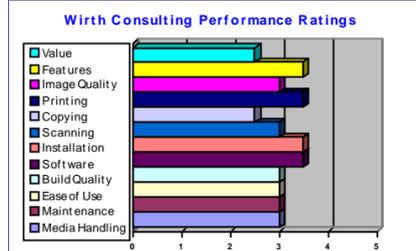

**Best Use**

Small businesses and workgroups that require a compact, relatively low-cost MFP with color print/copy capability, as well as scan and fax. Also for users that require capable printer management, especially where OKI systems are already installed. Moderate Cost Per Page and Total Cost of Ownership also make it suitable for home use.

HP's Color LaserJet CM2320nf MFP sits in the lower mid-range of HP color LaserJet MFP family. With its 450 MHz CPU, 21 ppm print speed and 40,000-page maximum monthly duty cycle, it's capable of taking on somewhat more larger workloads than entry-level MFPs. And while it doesn't incorporate a touch screen, it does incorporate a color graphic display that will make configuring job settings easier. Administrators can also password-protect color copying, to reduce unauthorized color copying and costs. Maximum flatbed scan size is 8.5"x11.7".

Driven by a 400 MHz CPU, the GelSprinter GX3050SFN uses piezo ink-jet color imaging technology. This imaging technology involves the use of viscous (versus the usual thinner liquid) ink that Ricoh says is waterproof and sun-resistant. Ricoh also says that its viscous inks are also faster drying, and less resistant to smearing—a traditional drawback of liquid ink-jet imaging. The system also incorporates larger print heads and an advanced belt-transfer system for enhanced productivity and print speed. Flatbed scanning is up to 8.5"x11.7", while up to 8.5"x14" (legal) via the Reversing Automatic Document Feeder.

Brother's MFC-9440CN features color capability in all modes—users can print, copy, scan and fax in color. It lacks duplex printing, but the MFC-9450CDN adds duplexing, however at a higher price (\$649.99 versus \$599). Also, the MFC-9440CN's flatbed is limited to 8.5"x11" (the MFC-9840CD provides 8.5"x14" platen scanning in contrast). Features of note include a generous maximum paper capacity (800 sheets) for this class, plus the system supports Light Directory Access Protocol (LDAP) so that, from the MFC-9440CN, users can securely access e-mail and fax addresses stored on the network.

The MFC-9450CDW is built on a similar platform as the MFC-9440CN, but adds duplexing (but at a higher price—\$649.99 versus \$599). It incorporates an ADF, not a duplexing document feeder for two-sided scanning. Another similar model, the MFC-9840CDW, adds legal-size scanning via the platen, while this model is limited to 8.5"x11". Users can print, copy, scan and fax in color. Features of note include large 800-sheet maximum paper capacity, plus the system supports LDAP so that users can securely access e-mail and fax addresses stored on the network.

**Best Use**

Small businesses and workgroups that require a compact, capable, relatively low-cost MFP with color print/copy capability, as well as scan and fax. Also suitable for home use. The system's low consumables' cost per page and low Total Cost of Ownership is especially an advantage in this price-sensitive segment.

Brother's MFC-9450CDW features color capability in all modes—users can print, copy, scan and fax in color. It adds duplexing, duplexing automatic document feeder and up to 8.5"x14" (legal) scanning via the platen. Features of note include a generous maximum paper capacity (800 sheets) for this class, plus the system supports Light Directory Access Protocol (LDAP) so that, from the MFC-9440CN, users can securely access e-mail and fax addresses stored on the network.

Xerox's Phaser 6110MFP/X is in the lower end of Xerox's color MFP family. It was designed for simple installation in small businesses and workgroups. Xerox says a typical installation takes only four minutes. Features of note include a generous maximum paper capacity (800 sheets) for this class, plus the system supports Light Directory Access Protocol (LDAP) so that, from the MFC-9440CN, users can securely access e-mail and fax addresses stored on the network.

**Best Use**

Small businesses and workgroups, and some enterprises, that require a compact, relatively low-cost MFP with color print/copy capability, as well as scan and fax. Most desirable in companies and satellite offices where Xerox systems are already installed. Also suitable for home use, where relatively higher Cost Per Page and Total Cost of Ownership is not as much a factor.

The X544N prints, copies, scans and faxes all in color. It's also powered by a robust 500 MHz CPU, is rated at up to 25 ppm in both B&W and color, and has a large maximum paper capacity of 901 sheets, so it's capable of taking on heavier workflows. It also provides PANTONE color-matching, so it's suitable for color-proofing and some graphic-arts applications in addition to typical business-imaging applications. Original scanning is up to 8.5"x14" (legal).
