

Software Developer

£30-£40k depending on experience

About Expert Agent

Expert Agent supply powerful web based estate agency software, letting agent software plus estate agent website design solutions. Used in over 2000 branches, our web based estate agent software & letting agency software is suitable for residential & commercial estate agents, letting agents, property management companies and private landlords.

Expert Agent is used by 5000 negotiators, administrators and managers every day. Over 15% of all properties sold and rented in the UK in 2016 were processed through Expert Agent. At any time, our servers are managing the process of marketing well over 100,000 properties to over 1m potential buyers.

Our products are well designed and thoroughly tested, because, well, this is all we do. We're a team of 35 people, based in Frome, just outside Bath – the Silicon Valley of the West! Between us we have 65 years of experience supplying software to estate agents and 20 years of volume residential estate agency experience. We've been in business as Expert Agent since 2003 (and many of us worked in Mike Griffiths' previous estate agency focused software business) and have a £3.5m+ turnover in 2016.

About the job

We're looking for a senior ASP.NET developer to join our friendly and hard-working development team working on exciting new projects as we grow our software.

Primarily you'll be developing and implementing web-based solutions using ASP.NET (VB.NET) technologies.

You will need to be able to communicate well with both clients and other team members and will also need to have an excellent grasp on Microsoft SQL Server, HTML, CSS, JavaScript and jQuery.

You will need to illustrate these concepts with examples of past development and projects you have been involved with.

- Minimum 2 years' experience of Microsoft .NET programming HTML, CSS, JavaScript using jQuery & Visual Studio
- Knowledge and experience of MS SQL Server
- Experience with integrating web design with back-end coding
- Skilled in database design, business analysis, requirements capturing and technical specification
- Experience of financial systems, or mission critical systems advantageous
- Good understanding of cross-platform and cross-browser issues
- Good project management skills
- Innovative thinking
- Good problem solving capabilities
- Perform well under work demands
- Excellent written and verbal communication
