MiHIA Health Dashboard 4.0
Who Can Benefit?

As MiHIA continues to enhance its programming efforts to reach its goal of becoming the healthiest region in the state, it will be vital to have data and information around health, healthcare delivery, quality of life, and the well-being of our counties. These enhancements will be made to the MiHIA Dashboard and will provide healthcare systems, higher education, public health departments, social service organizations, and community partners the ability to receive data that is useable, accurate and credible from MiHIA.

A second, but an equally important impact Dashboard 4.0 will have is reduction of waste in duplicated efforts and spending across the region. This will allow each county to access relevant, real-time data, have a single format for Community Health Needs Assessment (CHNA) and our overall savings will be significant.

The MiHIA Quadruple Aim Leadership Team and Population Health Team has repeatedly stated a desire for shared regional data source, with common methodology of tracking and trending. This request will be met with the unveiling of Dashboard 4.0. The implementation of the MiHIA Health Dashboard 4.0, powered by Healthy Communities Institute (HCI), will solidify MiHIA's role within the region as the entity to go to when information and resources are needed for assessment, interpretation, prioritization of health issues, evidence-based interventions, local and regional initiatives and sharing of success stories.

Who Can Benefit

- **Community Leaders:** Identify priorities and advocate for solutions for improving the health of our communities
- **Public Officials:** Easily find data and create reports to support population health improvement efforts and policies
- **Employers:** Discover programs to improve employee health and wellness to boost workplace morale, reduce absenteeism and increase productivity
- **Educators:** Learn about effective programs to promote healthy behaviors for students of all ages, data for research based projects and giving our students the knowledge about current health barriers our communities face
- **Providers:** Access regional data for a broad range of health issues and find evidence based preventative and disease management programs
- **Businesses:** Help drive decisions and tailor healthcare benefits to the needs of their workforce. Data helps develop forward-looking healthcare options for employees.
- **Consumers:** To understand the health of their community and access to programs within the region.

MiHIA's Health Dashboard 4.0 is your guide to improving community health in Arenac, Bay, Clare, Gladwin, Gratiot, Huron, Iosco, Isabella, Midland, Ogemaw, Roscommon, Saginaw, Sanilac and Tuscola counties.
