

Before starting cineXtools you must first have a license installed on your system or on a connected iLok USB key.

The first steps are:

1. Create an iLok account if you do not already have one.
2. Install iLok License manager.
3. Activate your license on your computer or onto an iLok USB key.

1)

Fill in the registration form, making note of your ID, as you will need that going forward

2)

Download and install the appropriate License manager version for your system.

If you plan to install the cineXtools license on your computer, install License manager on that same system.

User ID:

Password:

Remember User ID and Password on this machine

Once you have License Manager installed, open the application and sign in.

3)

Available licenses are displayed at the right of the main License Manager window.

The dark key icon means the license can be installed on an iLok USB key. The dark monitor icon means the license can be installed on a computer.

License destinations are shown at the left. Dark destinations are currently available to receive licenses. In this case, V5 is the local computer.

To activate a cineXtools license, you can click a license and drag it to the computer or iLok USB key or, Right Click (Mac=Control+Click) the license, select the appropriate destination and select "Activate".

Confirming moves and activates the license on the target destination.

If you installed the license on your computer, you are ready to install cineXtools or, if it's already installed, start cineXtools.

If you installed your license on an iLok USB key, assure your key is connected to the computer before starting cineXtools for the first time.

cineXtools installation notes:

You will need administrator privileges to install cineXtools.

Follow the standard procedures for installation on Mac or PC however, if you are installing on Windows 10, its possible this dialog will appear when you first start the installer. This is normal.

Click on More Info and then, at the following dialog, select "Run anyway".

The Windows 10 installation will proceed normally after that.

For Windows 7, assure your system is fully up to date. If you have an issue, additional information regarding Windows 7 installations is here: http://cinextools.com/cinextools-overview/#sys_requirements
